

CT241 Series

Ultimate convenience – control your thermostat plus three other household devices from a touchtone phone

MODEL & RATINGS

CT241-01 4 universal relay outputs (dry contact)
Each output operates independently

FEATURES

Universal outputs (4) work with thermostats and household devices operating with dry contacts

Connects directly to existing phone line

Works with home/cell phones and is compatible with answering machines

One-touch buttons enable manual override of controller output status

LEDs show output status

Programmable ring setting enables user to select number of rings (1 to 9) before controller answers

Battery-free backup saves user settings and output status after a power outage

Password-protected for secure access

COMPATIBLE WITH AUBE THERMOSTATS:
TH113 Series for baseboards and convectors (p. 17)
TH115 Series for baseboards and convectors (p. 18)
